

LATERALS:

Available in 12mm and 16 mm outside diameter with 1-1.3mm wall thickness conforming to IS specification. Also available in 0.6-0.8 mm thickness. These laterals are made from virgin LLDPE material with black master batch additives of the highest standards to give the best UV resistance for very longlife operations. These are also available with antirodent additives using bifferant which is not harmful but prevents rodents from biting.

DRIPPERS

- **Openable Turbo type:** Non pressure compensating . Available in 4 and 8 lph discharge with ISI Mark. Each dripper is individually factory tested for discharge to give the best uniformity. The material used is of best quality for complete UV stability and life. Also available in pressure compensating 4 lph discharge.
- **PCND Dripper :** These dripper have been newly developed by us and would be available at the price of regular drippers in the market. With these drippers all plants at any length or level would get the same quantity of water.

MICROTUBES

Available in 1 .2, 1 .3, 1.5 and 4mm in LLDPE virgin material.
